

TimeCheckPoint

```
graph BT; TimeDiffer[TimeDiffer] -.->|total, avg| TimeCheckPoint[TimeCheckPoint];
```

The diagram illustrates a relationship between two classes. At the top is a white rectangular box labeled 'TimeCheckPoint'. At the bottom is a gray rectangular box labeled 'TimeDiffer'. A dashed purple arrow points from the 'TimeDiffer' box up to the 'TimeCheckPoint' box. To the right of the arrow, the words 'total' and 'avg' are stacked vertically, indicating the attributes being passed or updated.
